

RADIATION SAFETY PROGRAM UPDATES (January 2023)

TRAINING

Annual Radiation Safety Training Requirements:

Effective January 2022, university personnel that handle radiation, will be required to complete an annual Radiation Safety Refresher course. This is in addition to the required initial safety training. The annual refresher course is necessary to ensure the safety of our lab personnel and for UCF to remain in compliance with policies and regulations. According to U.S. NRC 39.61 Subpart D, you are required to complete annual refresher training.

You should be receiving an email asking you to sign up for the training in the coming days. It will come from Webcourses and will state:

“You are currently more than six months overdue on completing your required safety training for EHS303: "Radiation Safety Annual Refresher for Radioactive Materials Users". Please contact EHS at EHSTraining@ucf.edu for instructions.”

If you do not receive this email and handle radiation as part of your duties, please contact us at ehs@ucf.edu right away.

DOSIMETERS

New information relating to dosimeter use and requirements has been added to our webpage at <http://www.ehs.ucf.edu/radiation-safety>.
