Step 4: Click on + Browse New Forms button on the top left then click Start next to the *Lab Hazard Assessment* option. Choose your name on the *Researcher* dropdown menu and click *Create Assessment*.

The screenshot shows a web application interface for selecting forms. At the top left, there is a button labeled "+ Browse New Forms". Below it, there is a section titled "Form" with a dropdown menu. In the center, there is a modal window titled "Assessment Form" which contains a list of forms under the heading "UCF FORMS". The list includes the following forms:

Form
Start → Accident-Incident Report ⓘ
Start → Biological Agent Registration Form ⓘ
Start → Hazardous Waste Generation ⓘ
Start → Incubator Hazard Assessment ⓘ
Start → Laboratory Closeout Notification ⓘ
Start → Laboratory Closeout/Transfer Form ⓘ
Start → Laboratory Hazard Assessment Tool (LHAT) ⓘ
Start → Laser Registration Worksheets ⓘ
Start → Notice of Decontamination ⓘ

A red arrow points to the "Start" button next to the "Laboratory Hazard Assessment Tool (LHAT)" form.

Step 5: Add any lab workers to your group by clicking *Find Worker*, searching for them using their first\last name, clicking *Select* next to their name, looking for others to add or clicking *x Close* to finish. Remove lab workers from your group by clicking the *x* next to their name. **You must also contact EHS when removing lab workers so that they may be removed from any of your permits.**

Add the labs you want to attach to this specific LHAT by choosing the building name from the dropdown menu on the bottom left and then clicking the green arrow to the right of the lab number. You may have more than one LHAT for different labs if they have different hazards (e.g., Chemical labs and Laser labs). Otherwise, choose the highest hazard found in any of the labs when grouping them together.

Click *Next* at the bottom of the page when done.
